

Software Engineer – Intern

Sync Layer, Inc. is a small entrepreneurial company in Fairfax, VA specializing in developing innovative software products for law enforcement. For additional information, go to www.SyncLayerInc.com and www.SyncArena.com.

We are looking for an intern who is currently pursuing a degree in Computer Science or a related field to provide software engineering support. You must be self-motivated and interested in working in a start-up environment. The intern will be working alongside a senior developer and therefore will have the ability to quickly learn new skills, while being expected to contribute.

Responsibilities include but are not limited to:

- Support software solution development efforts
- Complete debugging, testing and maintenance tasks
- Provide customer support
- Develop technical documentation

Mandatory Technical Skills:

- Computer Engineering or Computer Science Degree (currently pursuing)
- Competent programming with current languages to include but not limited to: Java, Groovy, JavaScript
- Demonstrated experience with software development tools
- Demonstrated ability to systematically and exhaustively test your own work

Note: These are mandatory requirements. Please do not submit your resume if you do not meet these requirements.

Desired Technical Skills

- Experience working with web platforms
- Experience with data analysis and geospatial technologies
- Experience creating mobile applications

Required Soft Skills

- Sound judgment in the planning and execution of tasks
- Responds well to leadership and direction
- Self-motivated
- Results oriented team player
- Excellent problem-solving and analytical skills
- Ability to balance self-guided learning with efficiently seeking guidance

Hiring immediately. Please submit resume, salary requirement, and potential start date to: management@synclayerinc.com.
